

TRUST THE NAME THAT STARTED IT ALL

Allen organs

SOUND | TECHNOLOGY | SUSTAINABILITY

Acknowledging Our Past, Securing Your Future

DeWitt Community Church in DeWitt, New York recently installed this elegant custom Four-Manual Allen Organ in a two-tone Colonial finish to blend with the decor of the church. This 46-channel instrument features Allen's new APEX™ tone generation technology plus a host of console customizations. This Allen will provide DeWitt's music ministry with plenty of versatility and superb sound for decades to come!

"We worked with our Allen Representative to create an instrument that is very similar in style and layout to our former Allen while taking full advantage of the many new developments in digital organ technology since the previous instrument was built in the 80s. The sound quality and sampling options of the various suites makes this a truly exciting instrument to play!"

- Abel Searor, Music Director/Organist

Proudly building our organs in the U.S.A. since 1939,
Allen Organ offers unprecedented security by providing sustainable parts and service for your current Allen.

Trust the name. Secure your future with Allen.
